Global PC Market Decline Eases, Shipments Fall by 12% Yo-Y in Q2

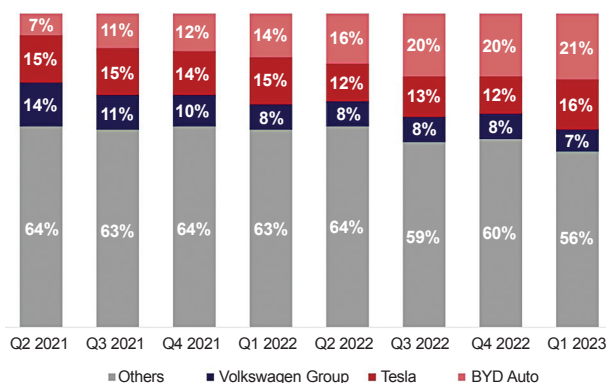

The global PC market decline eased in Q2 2023, with shipments dropping 12% compared to the previous year, reported Canalys, as the blow was cushioned by increased public sector funding and back-to-school demand. Shipments of desktops and notebooks totalled 62.1 million units, showing a sequential increase of 11.9%. Individually, notebook shipments slipped 9.3% annually to 49.4 million units, while desktop shipments fell 19.3% to 12.6 million units. The report said the increase in end-user activation rates compared to the sell-in shipments could indicate a potential bounce back in the market.

Global EV Sales May Cross 14.5 Million Units By The End Of 2023

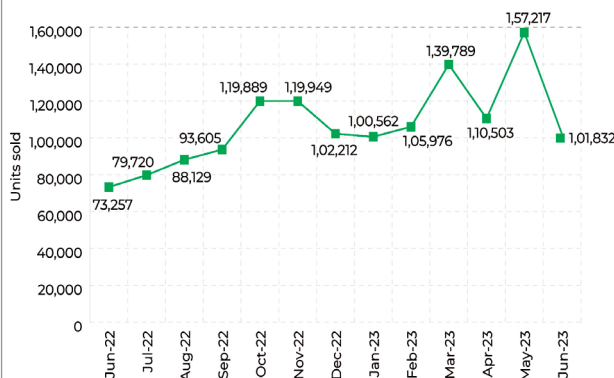

EV sales are expected to reach over 14.5 million units by the end of 2023, reported Counterpoint Research. One in every seven cars sold globally during Q1 2023 was an electric vehicle (battery EV and plug-in hybrid EV), with Tesla's Model Y becoming the best-selling passenger car model globally for the first time. Tesla's sales rose by 36% YoY in Q1 2023. The US surpassed Germany to become the world's second-largest EV market in Q1 2023, while China remained the leader.

India's June EV Sales Fall By 39% Q-o-Q

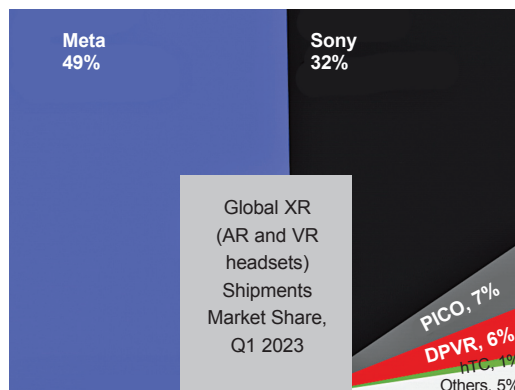

EV sales in June 2023 decreased by 35% compared to the previous month but increased by 39% compared to June 2022, as per the latest report by JMK Research. Electric two-wheelers and passenger-type electric three-wheelers dominated EV registrations in June 2023. Uttar Pradesh had the highest EV registrations in June 2023, followed by Maharashtra and Karnataka. Ola Electric retained the top spot among electric 2-wheelers, with 17,552 units sold, while Mahindra and YC Electric were the top players in the 3-wheeler EV market in June 2023. E-car sales jumped by over 97% compared to June 2022, with Tata Motors leading the market.

Extended Reality Market Shipments Fall By 33% In Q1 2023

Global extended reality (XR) shipments (augmented and virtual reality shipments) fell by one-third year-on-year in Q1 2023. Sony's next-generation PSVR2 and Meta's price reduction of the Quest 2 helped cushion the fall in market shipments, with the latter emerging as the best-performing VR headset. However, Meta's overall shipment share dropped to 49% in Q1 2023. Prices of next-generation VR headsets expected to launch in 2023 are anticipated to be around \$500, which could hinder their sales potential.
