

MSMEs and startups from a recent tender for the procurement of 5,491 units of desktop computers, issued by the Cooperation Department of Karnataka. The tender stated that bid splitting, MSE purchase preference, and Make-in-India categorisation were not applicable. The tender required bidders to have a turnover of ₹1,000 million for the previous year and an average turnover of ₹3,000 million for the past three years, effectively excluding MSMEs from participating.

BEL receives defence orders worth ₹80.91 billion in FY24

BEL has received orders worth ₹80.91 billion in the financial year 2023-24. The latest order of defence and non-defence products worth ₹21.91 billion was received on June 30. The order includes various products, such as a long-range guidance kit, jammer systems, radar upgrades, etc. These orders are in addition to the ₹59 billion orders already received on June 20, of which the significant order is for two regiments of the improved Akash Prime Weapon System, amounting to ₹39.14 billion. Akash is an all-weather, point/area air-defence weapon system.

Liquid Instruments partners with IEEE India to provide testing equipment to students

Liquid Instruments has partnered with IEEE India to enhance technical workforce development, establish efficient test and measurement labs, and provide focused webinars, workshops, and faculty development programs. The partnership involves the establishment of technical labs equipped with Liquid Instruments' testing equipment based on FPGA technology with software-defined instruments for various measurements. The partnership between Liquid Instruments and IEEE India will benefit universities and engineering students by providing enhanced educational opportunities and access to state-of-the-art test and measurement tools.

ICEA predicts smartphone exports to cross ₹1,200 billion in FY24

Indian Cellular and Electronics Association (ICEA) expects mobile phone exports from India to surpass ₹1,200 billion in FY24, compared to ₹900 billion in the previous year, with Apple's share exceeding 50%. Mobile phone exports in 2023-24 have experienced a growth of 128% in the first two months. The top five destinations for India's mobile phone exports are the UAE, the US, the Netherlands, the UK, and Italy.

Magenta Mobility, Altigreen, Exponent Energy partner to deploy 15-minute rapid charging EV fleet in India

Startups Magenta Mobility, Exponent Energy, and Altigreen Propulsion Labs have partnered to provide last-mile logistics solutions with efficient cross-utilisation and reduced operational costs. Magenta will deploy 1,000 Altigreen neEV Tez 3W vehicles powered by Exponent across India. Altigreen's neEV Tez vehicles can fully charge in 15 minutes, and Magenta will leverage Exponent's e^pump network for rapid charging. The partners plan to deploy 1,000 vehicles over the next 12 months.

Tata Electronics gears up to acquire Wistron's Karnataka plant

Tata Electronics, a wholly owned subsidiary of Tata Sons, is in the advanced stages of acquiring Taiwan-based Wistron's Karnataka plant, aiming to become the first Indian

iPhone maker. Besides iPhones, other new Apple products could be assembled at the Karnataka plant once Tata Group takes over. Minister of State for Electronics and IT, Rajeev Chandrasekhar, welcomed the news and praised Tata Companies and Apple teams. The move is expected to help Apple tap into production outside of China and boost its presence in the Indian smartphone market.

Foxconn to invest \$1B in second manufacturing plant in Karnataka

Foxconn plans to set up another unit in Karnataka with an investment of ₹88 billion. The new manufacturing plant will serve as a supplementary facility for assembly and will focus on manufacturing screens and outer coverings. The state government has identified a 100-acre parcel of land in Tumakuru for the proposed plant. The plant is expected to create over 14,000 jobs in the area.

Mitsubishi Electric to supply IGBT, SiC modules to three Indian engineering colleges

As a part of its corporate social responsibility (CSR) activities, Mitsubishi Electric plans to support semiconductor device labs at leading technical institutions, including IIT Delhi, BMS College of Engineering, Bengaluru, and Institute of Technology, NIRMA University, Ahmedabad, with educational kits and equipment. The company has supplied educational materials such as IGBT, silicon carbide, and intelligent power modules to benefit approximately 700 students.
