Signal Generator MG362x1A

Rubidium™ Source of Purity, Power, and Stability

Anritsu's new Rubidium MG362x1A RF/Microwave signal generator is built to deliver outstanding signal purity and frequency stability across a broad frequency range from 9 kHz to 70 GHz, even at high output power levels.

Key Features & Capabilities:

- Low phase noise and spurious performance unmatched in today's market
- Atomic clock frequency stability with optional internal Rubidium frequency reference
- AM, FM, and PM modulation, and comprehensive pulse generation capabilities for radar signal simulation
- High output power with low spurious eliminates need for external power amplification
- Low cost of ownership with on-site frequency calibration capabilities
