

**12 bit**

DHO900 Series

High-Resolution Digital Oscilloscope

Unleash the Power Within Witness the Wavevolution

Feature

250/125 MHz Bandwidth**12** bit vertical resolution**1.25 Gsa/s**Max.
real-time sample rate**4+16**4 analog channels and
16 digital channels**1,000,000 wfms/s**

Ultra Acquire Mode

**50 Mpts**

Memory depth

**25 MHz**Built-in
Signal generator (opt.)

Benefit

- 
4096 vertical digitizing levels
Make low-level signals measurement more accurate
- 
Compact Size
The Compact and thin design makes it light and portable saving great room for your workbench
- 
Type-C Interface
Provides power with mobile power supply via this interface, making the on-site test more flexible

Bode Plot Analysis

Addresses the loop analysis test on the switching power supply

Touch Screen Operation

7" (1024x600) high-definition touch screen

Bus and Trigger

Support RS232/UART, I2C and SPI bus triggers and decodes

Multiple interfaces for connectivity

The various communication interfaces such as HDMI, LAN USB

Webcontrol

Standard Web Control operation

APPLICATION

- ◆ Power Design
- ◆ Internet of Things
- ◆ Embedded Design
- ◆ Complex Demodulation
- ◆ Automobile Electronics
