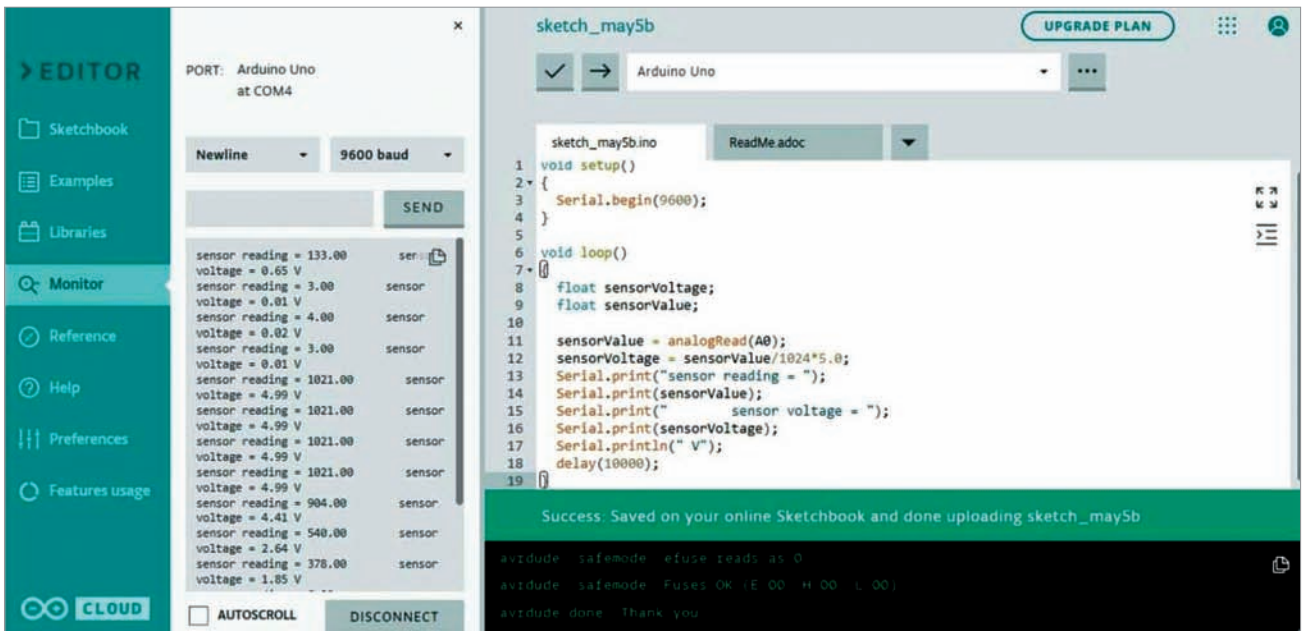

Fig. 9: Screenshot of the typical readings with the UV C lamp

tested with a smartwatch and a UV C lamp both. Fig. 8 shows the typical readings of the smartwatch.

The UV C lamp used for testing is a special-purpose lamp that is generally targeted towards sanitisation tasks. Its specifications are:

- Bulb shape size: A21
- Bulb base: E27

Incandescence: 4,000 kelvin
Brightness: 22,500 lumens
Power: 250 watts

Average life span: 5,000 hours

Fig. 9 shows the typical readings with the UV C lamp.

In conclusion, smartwatches emit UV rays in the range of 0-2 UV index, which is the range of minimal

danger zone and is not considered harmful for humans. **EFY**
