

Ioniq 5 To BMW i4

An Informed Look At
Luxury EVs Available In India

Hyundai Ioniq 5

Pros

- Great driving dynamics
- Rear-seating has a lot of positive feedback and is much better than similar-sized cars
- The UI is responsive, intuitive and free from gimmicky animations
- The ADAS has mixed feedback with lane-keep assist and adaptive cruise control
- You might need to pay extra attention during a test drive to see if it works well for your driving style

Cons

- No adaptive suspension makes the ride a little stiff on some roads
- White interiors might be tough to keep clean after a few years
- Rear windshield seems to be a magnet for dust, potentially due to the spoiler design redirecting air onto the windshield (not verified)
