

Easier Engineering: No Strings Attached

Analog Development Tool Ecosystem

Bring your analog design ideas to life with our Analog Development Tool Ecosystem.

With an extensive range of solutions for both analog and digital designers, selecting and validating your options has never been easier. Our advanced online design support software, fast and accurate analog circuit simulator, downloadable PCB footprints and schematic symbols for CAD designs and online design review service provide everything you need to simplify your mixed-signal, interface, and power application designs.

Try our user-friendly tools today to unlock cost savings, reduce complexity and minimize design time.

Key Features

- Leverage Treelink, our interactive product selector tool, to locate specific products in seconds
- Accelerate development with the MPLAB® Analog Designer—choose an existing solution or customize a suggested design
- Reduce design time and risk by simulating analog circuits prior to prototyping with the MPLAB Mindi™ Analog Simulator
- Download vendor-neutral PCB footprints and schematic symbols for export to EDA CAD/CAE design tools with the Ultra Librarian® Reader
- Collaborate with our team of experienced engineers through PowerCheck, our online design review service
