

Rajguru Electronics (I) Pvt. Ltd.

An ISO 9001:2015 Certified Company

AC-DC POWER CONVERTERS

SALIENT FEATURES

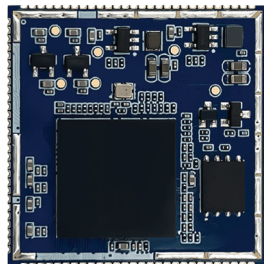

- + 85-265VAC/120-350VDC wide range input available.
- + Available in various power wattages range starting from 1W to 40W.
- + Open frame for certain popular power modules available.
- + Input and output isolation, isolation voltage 3000VAC.
- + UL-94V0 | Passed CE & RoHS certification
- + Meets EMC safety test.
- + Miniature and compact size.

AI FACE RECOGNITION

HLK-TX510 MODULE

- + HLK-TX510 is a module developed based on **Artificial Intelligence (AI) chip TX510**.
- + This module has AI computing power 1.2T@8bit/9.6T@binary, supports mixed precision, can quickly detect faces. It also supports 3D live detection, 3D face recognition, infrared live detection, visible light live detection, etc. It can resist two-dimensional attacks such as photos and videos, three-dimensional attacks such as masks, and has a high recognition success rate, which can be widely used in industries such as intelligent door locks, intelligent access control, financial payment, etc.

FINGERPRINT

HLK-FPM383F MODULE

FEATURES

- Area array semiconductor fingerprint sensor +
- The sensor surface is covered with a protective coating +
- RGB three color LED lights +
- UART interface +
- 3.3V power supply +
- ESD protection level >15KV +
- Supports storage of 50 fingerprint features +
- Support fingerprint splicing +
