Large-Area LCD, OLED Display to Shift to Oversupply Amid Weakening Demand

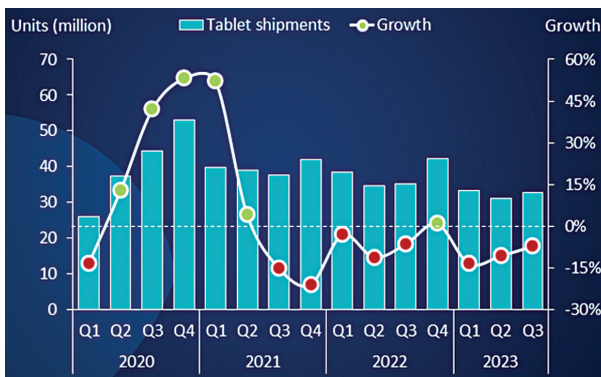

The large-area LCD and OLED supply-to-demand ratio, which improved in 2023 from 26.7% in 1Q23 to 13.7% in 3Q23, is expected to shift towards oversupply from 4Q23 into 1H24, impacting prices and profitability for panel makers. The improvement was driven by a 19.6% increase in area demand and a 1.6% growth in capacity over the first nine months of 2023. The current scenario sees a softening demand resulting in a glut ratio forecasted to shift towards oversupply.

Global Tablet Sales Witness 8% Sequential Increase

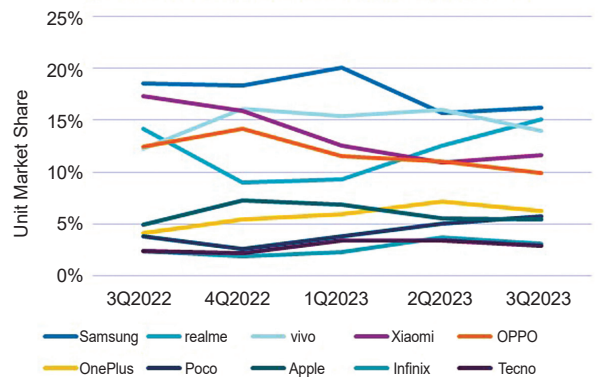

Despite a 7% annual decline to 33 million units in 3Q23, global tablet shipments experienced an 8% sequential increase, signalling a market revival ahead of the holiday season, while Chromebook shipments declined by 19%. Apple led the tablet market with a 38.3% share, shipping 12.5 million iPads in Q3 2023. Continued discounting and new product launches are expected to drive tablet market growth during the upcoming holiday season.

Indian Smartphone Market Remains Flat YoY in 3Q23

The Indian smartphone market stagnated YoY in 3Q23, shipping 44 million units, with a significant focus on affordable 5G devices and diverse performance across different price segments. July and August showed single-digit growth due to early festive stocking, but September witnessed the lowest shipments since 2019 due to tapered demand and high prices. Samsung surpassed vivo for market leadership despite a YoY decline in shipments.
