

MPLAB[®] Machine Learning Development Suite

Integrated Workflow for Streamlined ML Model Development

Take your embedded designs to the next level. Our MPLAB[®] Machine Learning Development Suite is a comprehensive and integrated intuitive workflow that provides everything that you need to develop and improve products integrating machine learning inference. Whether you're working on new designs or optimizing existing ones, our Development Suite is the ultimate solution to streamline your development process with ease.

This platform enables faster development and quicker time to market, while also keeping costs down. Everything you need is fully integrated into our intuitive MPLAB[®] Integrated Development Environment (IDE). Elevate your designs and discover unparalleled success with our MPLAB Machine Learning Development Suite.

Key Features

- Designed for embedded engineers
- AutoML mode available
- Available for 8/16/32B MCU/MPU
- Models library developed and optimized for edge devices
