ADIY 'MADE in INDIA' Products

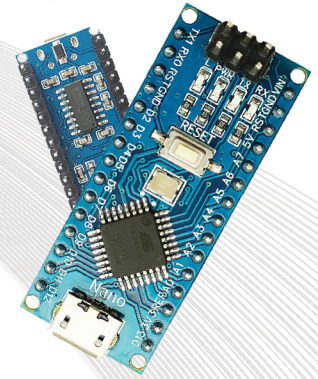

ADIY FLY Pico Basic Board

ADIY FLY comes with a large on-chip memory, symmetric dual-core processor complex, deterministic bus fabric, and rich peripheral set augmented with a unique Programmable I/O (PIO) subsystem, RP2040 provides professional users with unrivalled power and flexibility. ADIY FLY pairs RP2040 with 4MB of Flash memory. The RESET button on ADIY FLY makes the usage of module easy.

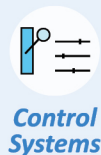

ADIY UNO R3 Compatible CH340C

ADIY UNO R3 - CH340C is a microcontroller board based on the ATmega328P. Instead of ATmega16U2 processor, it is assembled with CH340C IC. It has 14 digital I/O pins (of which 6 can be used as PWM outputs), 6 analog inputs, a USB connection, a power jack, an ICSP header and a reset button.

ADIY NANO

ADIY Nano board is fully as compatible as Arduino Nano. It is based on the ATmega328p-AU from the Atmel, the SMD version of one used in Arduino Uno. The advantage of this module, is that is very small in size as compared to Arduino Uno. It has integrated USB, and is breadboard friendly. It does not have any power jack but still 9V DC can be provided to Vin pin.
