1Q23: Indian Smartwatch Market Shows Remarkable Growth

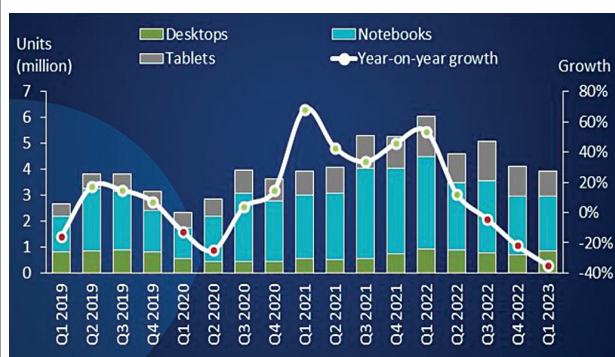

Counterpoint's latest research revealed that while the global smartwatch shipments contracted 1.5% YoY in Q1 2023, India's shipments witnessed a whopping 121% growth. This was the second consecutive quarter of a YoY decrease in global shipments, but the decline was restricted thanks to the Indian market. The market growth in India was driven by affordability, rising customer demand, and the availability of a wide variety of options in the budget segment.
