April EV Sales Up by 51% Y-o-Y in India

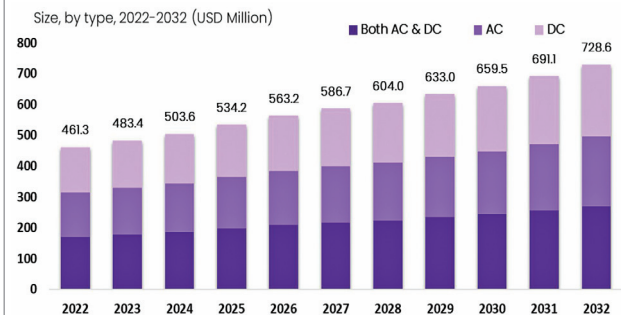

As per JMK Research, the overall EV sales in April 2023 increased by 51% from that of EV sales in April 2022. But the report suggested that the market saw a month-on-month decline of ~21% to reach 110,503 units. Electric two-wheelers and passenger-type electric three-wheelers together accounted for a whopping 90.48% of total registrations in the month.

Global Power Device Analyser Market to Cross \$728.6 million by 2032

As per a report by market.us, the global power device analyser market seems to be set on a growth trajectory for the upcoming decade. It projects the market to touch the highest CAGR of 4.8% between 2023 and 2032. Used in power electronics applications, a power device analyser measures electrical characteristics. While the high initial costs and low overload capacity are potential challenges, the increasing adoption of EVs acts as a major driving factor.

IoT Analytics Lowers Five-Year IoT Market Outlook

IoT Analytics' State of IoT—Spring 2023 report has forecasted that the chip crisis was likely to continue in the face of increasing demand. It also attributed the lowered outlook to the uncertainties posed by US-China tensions. The amount of money invested in global IoT start-ups decreased significantly in the last 12 months.

Global IoT Market Forecast (in billions of connected IoT devices)
