

Government invites applications for incentives under PLI 2.0 for IT hardware

With the aim to push India's manufacturing capabilities and enhance exports, the Union Cabinet approved the Production Linked Incentive (PLI) Scheme 2.0 for IT hardware on 17th May. The government allocated a total budget of ₹170 billion for a tenure of six years. In a recent update, the concerned ministry notified the scheme on 29th May and opened the window of applications under the scheme from 1st June. It is noteworthy that the approved applicants of existing PLI will also be allowed to apply under PLI 2.0.

MeitY transfers Li-ion battery recycling tech to recycling industry

Under the 'Promote Circularity Campaign' of Mission LiFE, the Ministry of Electronics and Information Technology (MeitY) recently transferred "cost-effective" Li-ion battery recycling technology to nine recycling industries and start-ups. The newly developed tech could process assorted types

of discarded Li-ion batteries and recover crucial elements like lithium, cobalt, manganese, and nickel in their oxide/carbonyl forms. These secondary raw materials could be used for battery manufacturing or in other potential applications, according to the official press release from the ministry.

PEOPLE (on the move)

Vedanta-Foxconn Semicon welcomes new Senior VP Mike Young

Vedanta-Foxconn Semiconductors Limited (VFSL), a joint venture between Taiwanese multinational electronics major Foxconn and Vedanta Group, recently announced the appointment of industry veteran Mike Young

as the Senior Vice President of the project management office and manufacturing operations. The company said that Young will oversee the execution of manufacturing and operational processes as VFSL looks at setting up a semiconductor fabrication unit in India.

Daniel Teuthorn appointed VP and GM of Quantic X-Microwave

Quantic Electronics recently announced the appointment of Daniel Teuthorn as the Vice President and General Manager of Quantic X-Microwave. As per the company, Daniel will help to drive the next phase of Quantic's growth in providing modular RF and microwave building blocks for the seamless design, evaluation, prototyping and production of higher-performance RF and microwave systems. Before joining here, Daniel was the Vice President of Engineering at Teledyne Microwave Solutions, where he was responsible for the overall business strategy and the technical roadmap of the company.

Semtech appoints Paul Pickle as CEO as Maheswaran retires

Leading semiconductor, IoT systems, and cloud connectivity service provider Semtech Corporation recently announced that its board of directors has appointed Paul H. Pickle as Semtech's new President and Chief Executive Officer. The company stated that Paul will join Semtech before 30th June, pending the transition from his current role as the CEO of Lantronix. Paul will succeed Mohan Maheswaran, who announced his retirement in March.

BattRE Electric Mobility welcomes Abhishek as new COO

Established in 2017, the leading Indian e-mobility company BattRE Electric Mobility recently named Kumar Abhishek as their Chief Operations Officer. As the COO, Abhishek will oversee and drive the operational excellence of BattRE Electric. The official release said that he will play a key role in driving the company's operational efficiency and strengthening its sourcing and supply chain, while also focusing on new products. It is noteworthy that Abhishek has around 22 years of experience in managing strategic sourcing and supply chain at Maruti Suzuki and Hero Motocorp.
