

Prototyping, Development & Testing Solutions

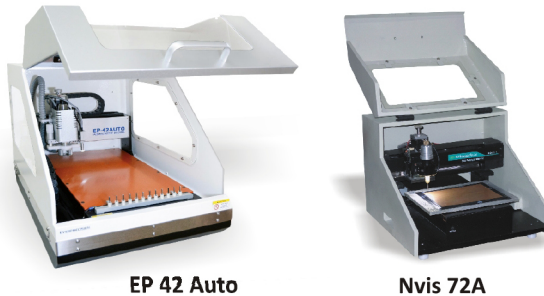

Circuit design and Simulation Software with PCB design

- More than 20,000 component library.
- Circuit Design and Simulation for Analog, Digital Microcontroller and RF Circuits.
- DC, AC, Transient Analysis.
- Integrated PCB Design.
- Generate G Code & Gerber file for PCB Prototyping Machine to fabricate.

PCB Prototyping Machines

- Fast fabrication of PCB's.
- Manual & Automatic models.
- Auto tool changer (up to 12 tools).
- 42,000 rpm spindle motor for shortest machining time.
- Automatic surface inspection and auto level.
- High accuracy.
- Micro drilling & milling.

Comprehensive Test & Measurement Solutions

Spectrum Analyzers

Digital Storage Oscilloscopes

Waveform Generators

Programmable DC Power Supplies

Digital Multimeter

Reliable, Rugged, and Accurate Data Loggers

- Environmental research & protection.
- Water resource management.
- Building performance.
- Agriculture monitoring.
- Cold chain.
