India Breaks Into Global Top Ten for Annual Robot Installations

As per a recent report from the International Federation of Robotics (IFR), sales of industrial robots in India in 2021 witnessed a whopping hike of 54% compared to the previous year and the installed numbers reached a new record of 4,945 units. We now rank tenth in terms of annual robot installations. However, India's robot density in the automotive industry is still nascent as compared to that of China.

Manufacturing Innovation Not Yet Common in India, But Profitable: NMIS 2021-22

The National Manufacturing Innovation Survey (NMIS) 2021-22 was conducted by UNIDO and DST to measure and map innovation activities, capabilities, linkages, outputs, outcomes, and barriers to assist DST in developing robust analytical frameworks for measuring it. It found out that most firms engaged in innovation activities in specific pursuit of innovations saw higher innovation successes. Karnataka (33.41) ranked highest on IMII 2022, while the Northeastern states (excluding Assam) (19.69) ranked the lowest.
