India Smartphone Market Shrinks in the First Quarter

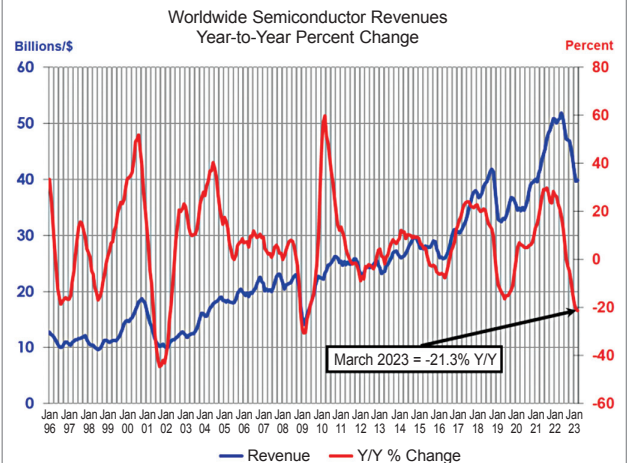

As per IDC data, India shipped close to 31 million smartphones in 1Q23 (Jan-Mar), witnessing a 16% year-on-year fall. The numbers were reported as the lowest first-quarter shipments in the last four years. In the said time period, while consumer demand didn't see any major uptick thanks to the uncertain macroeconomic space, inventory grew even more because of already high stocking in 2H22. The market is expected to have flat growth this year.

Global Chip Sales Fall by 21.3% Y-o-Y in Q1

As per the data released by Semiconductor Industry Association (SIA), worldwide semiconductor sales recorded a drop of 21.3% in the first quarter of 2023 as compared to the same quarter a year ago, despite reaching the highest-ever annual total of \$574 billion in 2022. The first quarter of 2023 recorded chip sales of \$119.5 billion, a decrease of 8.7% compared to the fourth quarter of 2022.

Worldwide Tablet Shipments Down to Pre-Pandemic Levels in 1Q 23

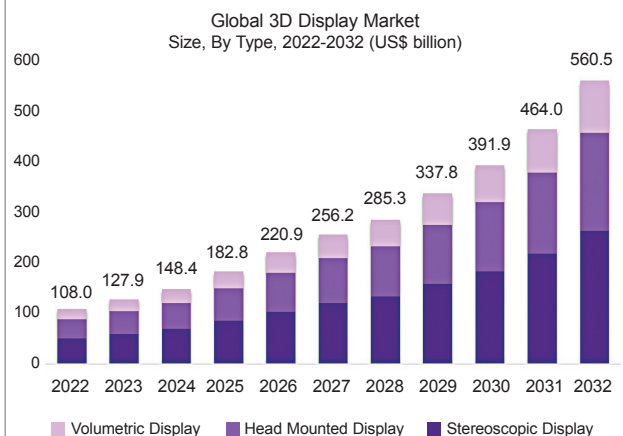

According to the latest data released by Canals, global tablet shipments fell to 31.7 million units after witnessing an 18% year-on-year decline in the first quarter of 2023. As a silver lining, though, vendors are expected to benefit from opportunities in the premium consumer segment and from increased deployments in commercial and education environments.
