Union Cabinet approves PLI Scheme 2.0 for IT hardware

The Union Cabinet, chaired by Prime Minister Narendra Modi, has approved the Production Linked Incentive Scheme 2.0 for IT Hardware with a budgetary outlay of ₹170 billion. With a tenure of six years, this scheme will cover laptops, tablets, all-in-one PCs, servers, and ultra-small form factor devices. As per the government, India is now the world's second-largest manufacturer of mobile phones and has exported over ₹900 billion worth of mobile phones in March this year. The updated scheme is expected to result in an incremental production worth ₹3,350 billion while employing around 75,000 people directly.

Government to invest \$2 billion in Mohali's semiconductor laboratory

The central government will invest \$2 billion in the Semiconductor Laboratory (SCL) in Mohali, to encourage research and prototyping, announced the Union Minister of State (MoS) for Electronics & Technology Rajeev Chandrasekhar at the

third SemiconIndia futureDESIGN Roadshow in IIT Delhi. As per the minister, the centre would establish the India Semiconductor Research Institute, which will serve as a centre of excellence (CoE). The CoE would work with institutes like IIT Delhi,

IIT Chennai, and others in a hub-and-spoke model. During the event, Morphing Machines and Netrasemi were approved as 'futureDESIGN startups' under the Design Linked Incentive (DLI) Scheme.

PEOPLE (on the move)

Zypp Electric appoints Gajendra Arya as new Senior VP-Tech
