

**EFY GROUP**  
YOURS SINCE 1969

**Facing  
problems in  
getting  
EFY Magazine  
in your area?**  
**If so, let us know!**

Electronics For You magazine is available at all top news-stands/outlets in India. But if you are facing problem in getting EFY magazine in your area, please call Akhilesh Yadav on **+91-8800295612** or drop an email at [efycirc@efy.in](mailto:efycirc@efy.in). We will help you locate the nearest news-stand or arrange a copy at your doorstep.

**electronics**  
**FOR YOU**

South Asia's Most Popular Electronics Magazine

Those who wish to distribute EFY Group publications may also call Akhilesh Yadav on +91-8800295612 or write at [efycirc@efy.in](mailto:efycirc@efy.in)

```

sketch_apr12a $
#include <esp_now.h>
#include <WiFi.h>

int count = 0;
// Structure example to receive data
// Must match the sender structure
typedef struct struct_message {
    char a[32];
    int b;
    float c;
    bool d;
} struct_message;

// Create a struct_message called myData
struct_message myData;

// callback function that will be executed when data is received
void OnDataRecv(const uint8_t * mac, const uint8_t *incomingData, int len) {
    memcpy(&myData, incomingData, sizeof(myData));
    Serial.print("Bytes received: ");
    Serial.println(len);
    Serial.print("Char: ");
    Serial.println(myData.a);
    Serial.print("Int: ");
    Serial.println(myData.b);
    Serial.println();
}

```

Fig. 9: Receiver code snippet

Fig. 10: Device mounted on iron

pin on or off based on the message received. See Fig. 9 for the snippet of the source code of receiver.

Upload the source codes of transmitter and receiver into ESP32 module. Place both transmitter and receiver inside the switch box, as shown in the author's prototype in Fig. 1, and mount them on the iron. The final prototype, after proper installation of the controller box on the iron, is shown in Fig. 10.

Now, even if you forget the electric iron on the cloth, it will not cause any harm; the iron will switch off automatically when not in use. **EFY**

S. Maheshwaran, an electronics researcher, completed MSc in electronics from St. Joseph's College, Tiruchirappalli, Tamil Nadu. His fields of interest are human-centric automation systems, embedded systems and robotics

K. Vairamani is also an electronics researcher. He did MSc in electronics from St. Joseph's College, Tiruchirappalli, Tamil Nadu and PhD in instrumentation from Madurai Kamaraj University, Madurai, Tamil Nadu. His fields of interest are wireless sensor networks and human-centric automation systems
