

“Automation Is Necessary To Attract Global Manufacturing Into India”

From having a hundred horses lug a few kilograms of load to a single autonomous bot carrying a tonne of payload, humans have surely come a long way. Fortunately, this isn't the end as the road ahead is even longer. Ati Motors' Founder and CEO, Saurabh Chandra, shares his wisdom with Yashasvini Razdan from Electronics For You on the future of bots in the material movement automation industry

**SAURABH
CHANDRA**
FOUNDER AND CEO,
ATI MOTORS

Could you tell us about Ati Motors' journey?

We started our journey six years ago with the dream of making autonomous robots for material movement, inspired by self-driving cars, and not by traditional robotics.

Since 2021, we have been able to bring out a product in the market, which matches the industry requirements, and has the right specifica-
