

Introducing STM32U5, the flagship of ultra-low-power MCUs

Ultra-Low power

- Down to 16 μ A/MHz in active mode,
- Down to 110 nA in low power mode
- Low power background autonomous mode (LPBAM)

High Integration

- Up to 4 Mbytes of flash memory
- Up to 2.5 Mbytes SRAM
- Rich set of peripherals

Embedded Security

- AES and PKA side-channel hardware resistant
- PSA and SESIP level 3 certified
- Arm[®] Cortex[®]-M33 with TrustZone[®]

NeoChrom GPU Outstanding graphics

- 2.5D graphic accelerator for
- Scaling
- Rotation
- Perspective correct texture mapping
