DO-IT-YOURSELF: PROJECT

lysed Wi-Fi networks on the smart watch are displayed in the form of graphs. Fig. 4 shows the code for getting RSSI of the networks while Fig. 5 shows the code to display the RSSI graphs of the Wi-Fi networks.

Construction and testing

While assembling the circuit, place the components carefully so that their terminals do not short with terminals of the other components. Now you can either use a readymade circular case for the watch or you can design your own case and 3D print it. You may download the Gerber file and PCB design to get the watch ready.

Connect the battery to JP1 and

Fig. 6: Wi-Fi analysing smart watch and the ESP board

wait for the ESP to scan Wi-Fi networks and display the analysed data with their SSID and signal strength. For charging the watch's battery, slide the switch to power off position and connect the micro USB

charger pin to the micro USB port on the watch.

Fig. 6 shows the final Wi-Fi analysing smart watch, including the ESP12 board made by the author. **EFY**

Job Guaranteed.

You don't need a training institute. Just do it yourself.

WORK WITH OPEN SOURCE.

www.opensourceforu.com

Demand for Open Source is sky rocketing. Be it for managing IT infrastructure or development of software —Open Source experts are what organisations are seeking. Develop expertise in an Open Source stack, and watch your career graph zoom.

You don't need a training institute for this. You can do it yourself. And, *Open Source For You* can be your friend and a guide through this journey.
