

Barathalwar. Tenstorrent CEO Jim Keller will join Bodhi Computing's board of directors.

MeitY task force to make India a product developer and manufacturer

In a recent update from the policy corner, the Ministry of Electronics and Information Technology (MeitY) has formed a nine-member task force to enhance product development and manufacturing in the country. As industry players look for alternatives to China and Vietnam, India aims to grab the chance to become a smart-phone manufacturing hub.

Gujarat CM inaugurates Drone Mantra Lab in Ahmedabad

While inaugurating the National Conference on Drone Technology in Ahmedabad, Gujarat Chief Minister (CM) Bhupendra Patel said that drone technology has huge potential to keep progressing further and the state government has premeditated

to start various pieces of training through Kaushalya University's School of Drones to promote it. The CM added that arrangements have been made to provide drone pilot training in 50 ITIs of the state for this purpose. The CM launched the 'Drone Mantra' Lab and inaugurated the national conference organised by the Labour, Skill Development and Employment Department, Government of Gujarat and Kaushalya - The Skill University.

Sunlit and RDL Tech collaborate to develop battery management systems

Leading manufacturer and distributor of batteries under the ARENQ brand, Sunlit Power, has entered into a five-year agreement with

IoT devices and software solutions provider, RDL Technologies. Accordingly, the partners will work together in the field of battery management systems and create touchscreen displays, data loggers, navigational systems for vehicles, and monitoring systems. Sunlit will be able to remotely monitor and control the motor, controller, and battery via the IoT devices, the company said in a statement. Moreover, they will also be able to give clients personalised performance data on their batteries. With the latest collaboration, the battery maker expects to produce 25,000 pieces of automotive clusters, touchscreen displays, and bulk testing equipment for batteries annually.

BPCL sets up fast charging corridors in southern India

One of the leading integrated energy companies in India, Bharat Petroleum Corporation Limited (BPCL), recently announced the launch of 19 EV fast-charging stations at 110 fuel stations along 15 highways in three southern states of India. As per the official communication, the company has launched 3 corridors with 19 fuel stations in Kerala, 6 with

33 fuel stations in Karnataka, and 10 with 58 fuel stations in Tamil Nadu. Installing 30kW fast charging stations, BPCL said that the corridors have been created to remove the range anxiety of electric vehicle owners driving long distances. To date, BPCL has converted 21 highways into electric corridors. For faster EV growth in India, the Maharatna company has already covered 200 highways with EV fast chargers across the country.

DroneAcharya and GridBots partner to manufacture drones in Pune

Pune based drone startup DroneAcharya Aerial Innovations has partnered with industrial robotics company GridBots Technologies to

commence commercial production, assembly, and export of drones and associated products from June 2023 at its Pune unit. Registered under Make in India initiative, 2007-born GridBots Technologies works in the fields of nuclear, space, and industrial robotics. DroneAcharya expects to start commercial production of small- and micro-category drones. The company has collaborated with various institutions to set up drone-pilot training facilities.

Electronics manufacturing cluster approved for Dharwad in Karnataka

In the latest update from PIB, Union Minister of State for Electronics & IT Rajeev Chandrasekhar has announced the approval for the setting up of the ₹1.8 billion (180 crore rupees) worth electronics manufacturing cluster (EMC) at Dharwad. It is noteworthy that the project is being set up at the Kotur-Balur Industrial Area in the Dharwad district of Karnataka under EMC 2.0 scheme. Along with the announcement in Bengaluru, it was suggested that the project is expected to create over 18,000 jobs and catalyse investments close to ₹15 billion soon. Nine companies have already committed ₹3.4 billion worth of investments at this EMC, which has a strategic locational advantage.

Bharat Electronics signs ten contracts with Defence Ministry

Bharat Electronics Ltd (BEL) has signed ten contracts worth nearly ₹55 billion (5,498 crore rupees to be exact) with the Ministry of Defence (MoD). BEL has signed two contracts with the Indian Air Force and Army and six contracts with the Navy. The Ministry also signed two contracts costing over ₹37 billion, which are aimed to enhance the operational capabilities, including surveillance, detection, tracking, and electronic warfare capabilities of the Indian Air Force. While the first contract pertains to the supply of medium-power radars 'Arudhra' for the Indian Air Force, the second contract relates to
