

129 DR-118 radar warning receivers. Notably, both the projects are under the 'Buy Indian - IDMM (indigenously designed, developed, and manufactured)' category.

ESSCI announces Electronics Olympiad at 10th Foundation Day

The Electronics Sector Skills Council of India (ESSCI) recently celebrated its 10th foundation day at the NDMC Convention Centre in New Delhi. The event saw the launch of the ELCINA White Paper on Workforce Development for Semiconductors. In order to spread awareness of electronics and skill recognition of students in schools, colleges, and higher education institutions, the Electronics Olympiad in association with CSC was also announced during the occasion. Moreover, a Skills Research Report on Semiconductors & Components, EMS, Hearables & Wearables, and Circularity/E-waste Management was also launched.

Tata Power Renewable Energy secures 200MW solar PV project

The leading Indian renewable energy player Tata Power Renewable Energy Limited (TPREL) has received the Letter of Award (LoA) from Maharashtra State Electricity Distribution Company Limited (MSEDCL), a wholly owned corporate entity under the Maharashtra government, to set up a 200MW solar PV project in Solapur district of the state. The project was awarded through competitive bidding, followed by a reverse e-auction. Calling it one of the most substantial solar PV projects, TPREL pointed out that the proposed solar PV project will cut around 432.94 million kg of carbon-dioxide emissions annually. The project is likely to be commissioned within 18 months from the PPA execution date.

Tata Motors to deliver XPRES-T EVs to OHM E Logistics in Hyderabad

India's leading automobile manufacturer Tata Motors has recently received an order for providing 1,000

XPRES-T EVs to OHM E Logistics in Hyderabad for their electric cab transportation services. It is learnt that these cars will be delivered to OHM E Logistics in a phased manner. Leading the e-mobility wave in India, Tata Motors claims to have rolled out over 50,000 Tata EVs from the plant to date in the personal and fleet segment. In July 2021, Tata Motors launched the XPRES brand exclusively for fleet customers. XPRES-T EV is the first vehicle under this brand.

Mahindra's Krish-e Smart Kit to track and digitise farming

Mahindra's agro-tech business unit Krish-e has launched its Krish-e Smart Kit (KSK). It is an after-market device which is the first of its kind to provide equipment owners with detailed insights into their tractors and farm equipment through GPS-enabled time tracking and remote monitoring of various parameters from the comfort of a smartphone. The kit enables equipment owners and rental entrepreneurs to sustainably improve fleet performance, improve incomes, and manage maintenance costs, while reducing tractor downtime and pre-

venting unauthorised usage of their tractors. The Smart Kit also includes an advanced trip replay feature for tracking commercial transportation and trolley activity.

TASL to make cargo doors for Airbus using cutting-edge technology

Airbus recently awarded a contract to Tata Advanced Systems Ltd (TASL) to manufacture cargo doors for the A320neo aircraft family. It is learnt that TASL will produce these doors at a new facility in Hyderabad using cutting-edge robotics and automation technology. Airbus currently procures components and services worth \$735 million from more than 100 Indian suppliers annually. In another news, the company announced that it has achieved in-flight autonomous guidance and control of a drone using an A310 MRTT. In a first step towards autonomous formation flight and autonomous air-to-air refuelling, Airbus believes that the technologies, known as Auto'Mate, are a major breakthrough for future aerial operations involving manned and unmanned assets.
