

“Our Customers Come To Us For The **SUPERIOR TECHNOLOGY** Of **OUR CAMERAS** And **THEIR QUALITY**”

Three engineers got together in late 2003 to form a design services startup. Within five years e-con Systems started eyeing the manufacturing market and within ten years of its inception the startup entered the camera manufacturing industry. Today, the company has more than 300 products in its portfolio. Co-founder Maharajan Veerabahu shared his learnings with Yashasvini Razdan from Electronics For You. Read on to know how a design services startup transitioned into a product manufacturing company over the course of two decades

**MAHARAJAN
VEERABAHU**
CO-FOUNDER,
E-CON SYSTEMS

Can you please tell us about the journey of e-con Systems?

We founded e-con Systems in October 2003 as three passionate engineers who wanted to make

electronics products. One of the co-founders was my college senior, the other was a friend he met at his first job.

We started with embedded

design services in the beginning. We started designing products for customers. We would do hardware design as well as software design, and the customers would take it
