

Nordic Low-power CloT SiPs for your DECT NR+ Applications

What is NR+

ITU-R Approved the world's first non-Cellular 5G technology, ETSI DECT-2020.

- Global and license-exempt 1.9 GHz band
- No need for cellular infrastructure
- Scalable range
- Reliable, low-latency communication
- Dense topology ex: A sq-km area can be covered by a little over 100 devices or scaled upto more than a million units

What Millennium Semiconductors & Nordic Offers

NRF9161 **SIP**

NRF9131 **MINI SIP**

Low-Power SIP for Cellular IOT and DECT NR+ Multimode LTE-M/NB-IoT with GNSS and DECT NR+ modem

- 700-2200 MHz LTE band support
- 1.9 GHz NR+ band support
- Certified for global operation

Dedicated application processor and memory

- 64 MHz Arm Cortex-M33
- 1 MB flash + 256 KB RAM
- Arm TrustZone + Arm CryptoCell

Millennium Semiconductors is an authorized distributor of Nordic Semiconductor
