Quarterly Indian Smartphone Shipments Decline Reduces in 2Q23

Smartphone shipments from India declined 3% YoY in Q2 2023, but the rate of decline was reduced compared to previous quarters. 5G smartphones accounted for 50% of the total smartphone shipments. Samsung held 18% market share and led the Indian smartphone market for the third consecutive quarter, while Vivo maintained its second position and experienced YoY growth.

Festive Season To Drive Online Smartphone Sales

With the festive season in full swing, 86% of Indian consumers planning to purchase a smartphone are inclined towards online purchases, and 31% of respondents want to upgrade to the latest smartphone technology.

The preferred smartphone brands are Samsung (33%), Apple (18%), Xiaomi (11%), and OnePlus (10%). 42% of respondents plan to purchase premium smartphones priced at or above ₹30,000.

Global Large-Area Display Shipments Forecast Drops To 7.3%

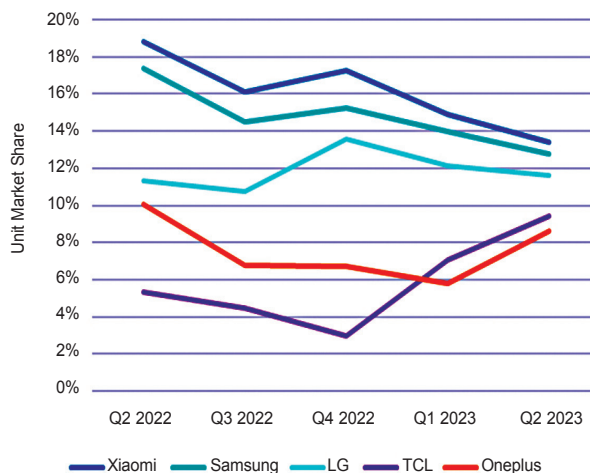

Large-area displays are expected to decline unit shipments by 7.3% YoY in 2023 due to weaker demand for mobile PCs and monitors. Display area shipments are projected to increase by 0.5% YoY. LCD TV display prices continue to rise in 2023, but losses persist in the IT LCD business. Display makers are focused on display price protection to minimise losses.

Applications	2021	2022	2023 (F)	2022 YoY (%)	2023 (F) YoY (%)
TV	268.6	270.3	253.8	0.7	-6.1
Monitor	172.4	159.3	154.5	-7.6	-3.0
Notebook PC	291.9	217.0	188.5	-25.7	-13.1
Tablet PC	171.7	158.6	150.1	-7.6	-5.4
Others/PID	71.2	90.0	82.6	26.4	-8.2
Total	975.8	895.3	829.6	-8.3	-7.3

But India's Smart TV Market Grew...

India's smart television market experienced an 8% YoY growth in the first half of 2023, with 4.5 million unit shipments. Online sales, festivals, the popularity of larger screen sizes, and decreasing prices have been driving this growth. Online channel sales increased by 25% YoY, reaching 39% share in 1H23.
