

The (lowest) Loss Leaders

XGL Family power inductors feature the industry's lowest DC resistance and extremely low AC losses for a wide range of DC-DC converters

Coilcraft's XGL Family of molded power inductors includes a wide range of sizes with inductance values from 42 nH to 56.0 μ H and current ratings up to 117 Amps. With up to 60% lower DCR than previous generation products, they are the most efficient power inductors available today!

Their ultra-low DCR and higher Irms also allow XGL Family inductors to operate

much cooler than other components.

All XGL Family inductors are qualified to AEC-Q200 Grade 1 standards (with a maximum part temperature of 165°C) and have no thermal aging issues, making them ideal for automotive and other harsh environment applications.
