

Micron, Tata Projects partner to build \$2.75B chip assembly, test plant

Micron Technology has partnered with Tata Projects to build a \$2.75 billion advanced semiconductor assembly and test plant in Gujarat's Sanand. Micron will contribute approximately \$825 million; the remaining funding will come from subsidies. The plant is expected to be operational by late 2024. The project, a part of the Indian Semiconductor Mission, will be located in the Gujarat Industrial Development Corporation area of Chaarodi, Sanand, and will cover an area of 93 acres.

Paranth Thiruvengadam to lead Atlassian's India ITSM operations

Atlassian Corporation welcomes Paranth Thiruvengadam to lead their India-based workforce and steer their ITSM (IT Service Management) approach. This dual role combines the responsibilities of India Site Leader and Head of Engineering ITSM. With an experience of over two decades, Paranth was earlier working as the Chief Technology Officer at Clear (formerly ClearTax) and MedLife, besides key roles at tech giants like Yahoo!, IBM Labs, and Walmart Labs. His expertise covers a broad spectrum, from developing SaaS platforms to web applications, infrastructure, and transaction platforms, impacting sectors such as finance, supply chain, healthcare, taxation, and regulatory compliance.

Intel appoints Sandra Rivera as CEO of Programmable Solutions Group

Intel Corporation has announced its intention to operate its Programmable Solutions Group (PSG) as a standalone business starting January 1, 2024, with Sandra Rivera as its CEO. This move is aimed at increasing PSG's competitiveness in the FPGA market and fostering strategic repositioning. Rivera, Executive Vice President at Intel, will lead PSG as its Chief Executive Officer (CEO). Shannon Poulin has been named Chief Operating Officer (COO) of PSG.
