

Calendar of Forthcoming Electronics Fairs/Exhibitions/Seminars/Events

Event, Date and Venue	Topics	Contact for details
Productronica 2023 November 14-17, 2023 Munich, Germany	World's leading trade fair for electronics development and production. Companies from the fields of PCB & EMS, SMT, semiconductors, inspection and quality, future production and smart factory, and cables, coils and hybrids will present their solutions and products.	Website: https://productronica.com
VLSI 2024 January 6-10, 2024 ITC Royal Bengal, Kolkata	Theme: "VLSI meets AI and Quantum for Cyber-Physical Systems." A platform for collaboration between multinational corporations, startups, industry organisations, and academics to synergise with what India's East and Northeast regions have to offer.	Website: https://vlsid.org
NEPCON JAPAN January 24-26, 2024 Tokyo Big Sight, Japan	Asia's leading exhibition for electronics R&D, manufacturing, packaging, and more. Consists of six specialised shows in essential areas for electronics manufacturing and R&D, making it a one-stop venue for all in the electronics industry.	Website: https://www.nepconjapan.jp/hub/en-gb.html
India Electronics Week January 31 - February 2, 2024 KTPO, Whitefield Bengaluru	India's No. 1 event for creators of smart electronics solutions to discover latest techniques, best practices and technologies for developing electronics better, cheaper and faster, and meet service providers, suppliers and partners who can enable growth of your business.	Website: www.indiaelectronicsweek.com
IoTShow.in 2024 January 31 - February 2, 2024 KTPO, Whitefield Bengaluru	The conferences and hands-on workshops, cutting-edge talks and trainings by industry stalwarts and thought leaders will help build the skills you need to get ahead in the field.	Website: https://www.iotshow.in
EFY Expo Pune May 16-18, 2024 Auto Cluster Exhibition Centre, Pune	Electronics expo with conferences on automotive electronics, EVs, and Industry 4.0 (IIoT). Covers a wide range of electronics-related technologies, products and topics including Electric Drive, Battery Management Systems, and IIoT solutions.	Website: https://www.efyexpo.com/PUNE/
Integrated Electronics Manufacturing And Interconnections 2024 (IEMI) July 29-30, 2024 Bengaluru	Themes: Advanced semiconductor packaging and aerospace and defence electronics. A networking platform for procurement and quality heads of OEMs, EMS, and semiconductor suppliers. Features top officials from government-owned defence, aerospace, and multinational corporations.	Website: https://www.ipc.org/ipc-india/iemi-2024-bangalore
EFY Expo Delhi & NCR August 2024 New Delhi	Major tech conference focusing on electronics, IoT, and AI. Simplifies new product development and manufacturing challenges in India. Offers assistance from leading suppliers, even for small batch productions.	Website: https://www.efyexpo.com/delhi-ncr/
Open Source India 2024 October 23-24, 2024 Bengaluru	Open Source For You magazine, in partnership with India's Open Source community and industry, brings various stakeholders under one roof to accelerate development and deployment of open source in India, and beyond.	Website: https://www.opensourceindia.in

Since this information is subject to change, all those interested are advised to ascertain the details from the organisers before making any commitment.

price of Sterling and Wilson Renewable Energy has already risen by about 5% after the news. The order contributes to Sterling and Wilson Renewable Energy's year-to-date order booking of approximately ₹31 billion and their confidence in surpassing the FY 2023 order booking.

India revokes policy on restricting laptop and tablet imports

India has revoked previous regulations and introduced an "import management system" to allow unrestricted imports of laptops and tablets, promoting transparency without hindering the global tech market supplies. The move is focused on data collection to ensure a reliable digital ecosystem for the electronics

industry, which is critical for international tech companies. This decision marks a significant policy shift, as India had briefly considered implementing an import licensing system for laptops and tablets earlier, which raised concerns among industry stakeholders and international entities, especially Washington.

India, Saudi Arabia team up on electrical grid interconnection

Saudi Arabia and India have signed an initial agreement to cooperate on electrical grid interconnection, green/clean hydrogen, and supply chains, aiming to enhance their economic ties through collaboration in the energy and renewable sectors. The agreement was signed by

Prince Abdulaziz bin Salman, Saudi Arabia's Minister of Energy, and Raj Kumar Singh, India's Minister of Power and New and Renewable Energy, during the UN MENA Climate Week 2023 in Riyadh. Last month, the two countries signed over 50 agreements covering various sectors, such as information and communication technology, entrepreneurship, chemicals, energy, and advanced manufacturing, further strengthening their economic ties. The Ministry of Investment of Saudi Arabia is opening a country office in India to facilitate Indian companies' investments in the kingdom.

Kaynes to build ₹28 billion compound chip unit in Telangana

Kaynes Technology is investing ₹28 billion to establish an outsourced semiconductor assembly and testing (OSAT) and compound semiconductor manufacturing facility in Telangana, under its subsidiary Kaynes Semicon, signalling the state's growth in electronics manufacturing. This investment is expected to generate employment for 2,000 people. The unit is expected to start operations within 12 to 18 months and will be located in Kongara Kalan, near Foxconn's upcoming electronics manufacturing unit. Kaynes Semicon will provide services for various semiconductor package types, including QFN, SOT, TO, BGA, and FC BGA, with a focus on power devices.

ELCINA seeks PLI scheme for non-semiconductor components

ELCINA, an electronics industry body, has urged the government to implement a PLI scheme for the non-semiconductor sector due to significant reliance on imports for electronic components in India. It highlighted that a substantial portion of such electronic components, about 68%, was imported in 2021-22, indicating a heavy dependence on imports in this sector. ELCINA mentioned the success of government schemes for devices and the
