

ChatGPT TERMINAL Made Using ESP32

SOMNATH BERA

You are all aware of ChatGPT and its power. This device that can incorporate ChatGPT and give you a portable, easy-to-

use, complete GPT machine. You can simply ask a question, seek an answer, or request a snippet of code, using a PS/2 keyboard connected to

the ESP32 microcontroller (MCU), and the terminal will assist you in displaying the problem statement on the TFT screen.
