

Mapped 33 out of 33 records.

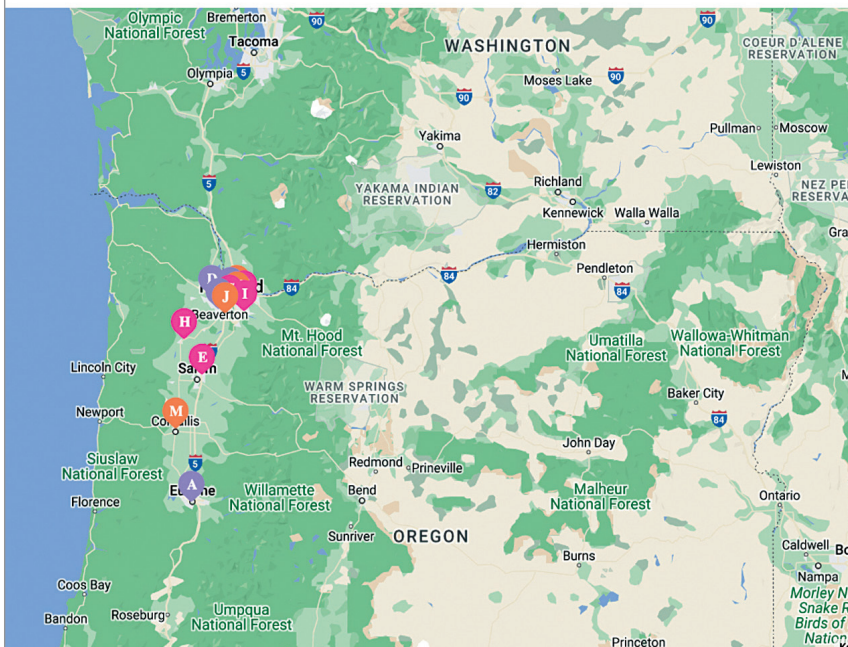

Fig. 8: Showing locations of different cargo on map

Utilising route maps

If you want to visualise the paths, routes, and location points, you can use for free websites like <https://www.mapize.com>. Copy the location data and paste it into the website to create route maps with all location points.

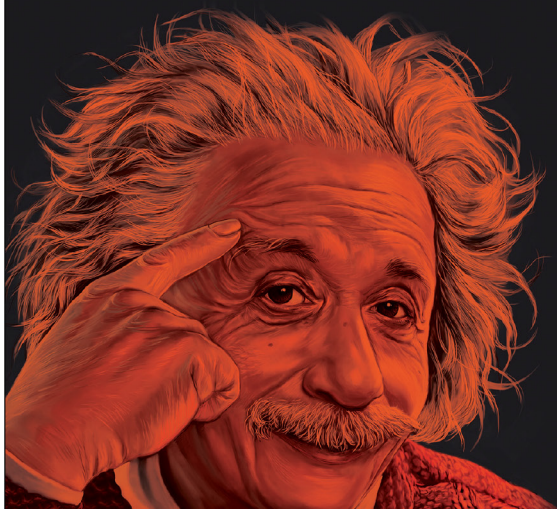

Fig. 7 showcases a route and map-making website, while Fig. 8 displays the locations of different cargos on maps.

In a world driven by data, harnessing the power of Google Sheets and GPS can streamline your logistics, offering real-time insights and simplifying complex operations. It paves the way for a future where every journey is efficient, seamless, and utterly precise. **EFY**
