

US, India approve \$1B collaborative fund for renewable energy infrastructure in India

The US Development Finance Corporation and India's National Investment and Infrastructure Fund have exchanged letters of intent (LoIs) to allocate up to £500 million each to establish a renewable infrastructure investment fund. The fund also intends to reduce capital costs and expedite the development of green-

field renewable energy projects, battery storage facilities, and emerging green technologies in India. Additionally, they plan to implement a payment security mechanism utilising government and private funds to expedite the procurement of electric buses manufactured in India, thereby reducing carbon emissions in the transport sector.

PEOPLE (on the move)

Lumax promotes Rajesh Verma to SVP Product Engineering

Lumax has promoted Rajesh Verma to its product engineering wing's Senior Vice President (SVP). Earlier, he was associated with the automotive components maker as Vice President of Engineering. Verma has been

working with Lumax since December 2020 and announced his appointment in a social media post. He has also worked with Varroc Lighting Systems, Visteon Engineering Center India, Belcan Corporation, ETCS-Inc, Onward Technologies, and Rolta India. Throughout his 28-year-long professional innings, he has majorly worked in automotive climate control systems, lighting systems, powertrains, and other automotive component domains.

Poornima Shenoy to head FICCI Americas desk

The Federation of Indian Chambers of Commerce & Industry (FICCI) has appointed Poornima Shenoy to head its Americas desk. She will be based in Washington, DC, United States for this role. She is an independent director at Dixon Technologies India, NSEIT, and Padget Electronics. Previously, she was an independent director with Moschip and the founding president of the India Electronics and Semiconductor Association (IESA). Shenoy has also held several other leadership roles in the past. On the other hand, FICCI, an association of Indian business organisations, says it is dedicated to promoting the growth and global competitiveness of Indian businesses.

Syrma SGS appoints Satendra Singh as CEO

Syrma SGS Technology Limited (Syrma SGS) has appointed Satendra Singh as its Chief Executive Officer (CEO). Based in Gurugram, Haryana, the company offers original design manufacturing (ODM) and electronics manufacturing services (EMS) capabilities to original equipment manufacturers (OEMs). Having started his professional innings with

Tektronix/ Ministry of IT/C-DoT as a scientist, Singh has been associated with Samsung India, Schneider Electric, Orion Electronics Kft, Flextronics Technologies India, and Nokia. He has led hardware delivery and manufacturing teams at some of these organisations. The news of his appointment as CEO of Syrma SGS comes when India has launched several production-linked incentive schemes (PLIs) around electronics manufacturing.

Gruner Renewable Energy appoints Anil Kumar Tyagi to advisory board

Gruner Renewable Energy has appointed Anil Kumar Tyagi, a 40-year veteran in the energy sector, to its Advisory Board. Tyagi will be vital in refining operational frameworks, enhancing risk mitigation strategies, and strengthening vendor relationships. Tyagi has a distinguished career spanning over four decades in the energy sector, with prior roles at Indian Oil Corporation Limited and IOT Utkal Energy Services. Tyagi's insights into efficient procurement, vendor assessment, and large-scale project management will provide GRE with a competitive edge in the renewable energy sector.

Muneesh Chellani joins SFO Technologies as President Electronics

Muneesh Chellani has been appointed President, Electronics, at SFO Technologies, a subsidiary of NeST Group. His expertise is expected to enhance SFO Technologies' position in the tech industry. The former COO of INDIC EMS Electronics Private Limited, Chellani has over 25 years of experience. SFO Technologies, excelling in manufacturing services and product technologies, serves a global clientele in sectors like healthcare, telecom, industrial, and energy. NeST Group anticipates Chellani's leadership will enhance their standing in the tech industry.
