

Coilcraft

DC-DC Optimizer Tool

- Finds the best off-the-shelf power inductors for your buck, boost, and buck-boost converters
- Uses measured inductor data instead of theoretical models
- Provides application-specific waveforms and complete DC and AC loss analysis

Reduce your design cycle time with confidence.

Coilcraft

XGL Family

Ultra-low Loss Power Inductors

Essential Values Designer's Kit

- Includes parts from 20 of our highest-performing products offering the industry's lowest DCR and ultra-low AC losses
- Covers a wide range of applications with 49 inductance values from 0.082 μH – 10 μH
- Soft saturation with current ratings from 520 mA – 25.0 A

* Kit includes three samples of each inductance value.
