

MG COMET TO BYD e6

4W EVs On Indian Roads Below ₹35 Lakhs

We have been discussing tech aspects of EVs since ages. But, after speaking to many readers, we realised that we cater to some of the earliest adopters of disruptive tech like EVs. Hence, the decision to launch a section dedicated to EVs. As a curtain-raiser, here's a special our senior editors put together—a first of its kind report on Electric Cars in India, priced below ₹3.5 million (35 lakhs).

MUKUL YUDHVEER SINGH AND DILIN ANAND

SELECTION OF PARAMETERS

Which parameters will be important for techies when evaluating EVs, and which ones are important for all buyers of cars? These two questions enabled us to finalise the list of parameters reported for each car. If we missed anything, do let us know (efy-edit-team@efy.in)—so we can report the same in future issues.

MG Comet EV

Pros

- Ultra-compact size, light steering and small turning radius of 4.2m
- A well-built and inexpensive hatchback that doesn't feel cheap
- MG is offering 250+ combinations of stickers, graphics, and designs to make your car unique

Cons

- Although the 165mm ground clearance is decent for this size, the motor and rear differential seem like they could use some underbody protection
- Zero boot space with all the seats up. You'll have to fold the rear seats if you want to carry any luggage
- 2-door design means difficult rear seat access. Also, it is a 4-seater, not 5
- Doesn't feel stable at high speeds and not recommended for highways

List Price: ₹7.98 to ₹10.63 lakh | **Battery Capacity:** 17.3kWh | **Range Promised (ARAI):** 230km | **Range Quoted By Dealers:** 175km | **Fast Charge Support:** No | **Battery Warranty:** 8 years or 120,000km | **Est.
