

Calendar of Forthcoming Electronics Fairs/Exhibitions/Seminars/Events

Event, Date and Venue	Topics	Contact address for details
IFA Berlin 2023 September 1-5, 2023 Messe Berlin Exhibition Grounds Berlin, Germany	The mega consumer electronics and home appliances trade show IFA is a great meeting place for key retailers, buyers, and experts from the industry and the media. It showcases exhibitors' brands to a global audience, generates qualified leads, and strengthens existing relationships. IFA Berlin offers discounted voucher codes to trade visitors!	Website: https://www.electronicsforu.com/events/ifa-berlin-2023 , www.indo-german.com
Open Source India 2023 October 12-13, 2023 NIMHANS Convention Center, Bengaluru	Open Source For You magazine, in partnership with India's Open Source community and industry, brings various stakeholders under one roof to accelerate development and deployment of open source in India, and beyond.	Website: https://www.opensourceindia.in
Productronica 2023 November 14-17, 2023 Munich, Germany	World's leading trade fair for electronics development and production. Companies from the fields of PCB & EMS, SMT, semiconductors, inspection and quality, future production and smart factory, and cables, coils and hybrids will present their solutions and products.	Website: https://productronica.com
India Electronics Week January 31 - February 2, 2024 KTPO, Whitefield Bengaluru	India's No. 1 event for creators of smart electronics solutions to discover latest techniques, best practices and technologies for developing electronics better, cheaper and faster, and meet service providers, suppliers and partners who can enable growth of your business.	Website: www.indiaelectronicsweek.com
IoTShow.in 2024 January 31 - February 2, 2024 KTPO, Whitefield Bengaluru	The conferences and hands-on workshops, cutting-edge talks and trainings by industry stalwarts and thought leaders will help build the skills you need to get ahead in the field.	Website: https://www.iotshow.in

Hyundai Motor signs APA to acquire GM's Talegaon plant

Hyundai Motor India has signed an asset purchase agreement (APA) to acquire and assign assets related to General Motors India's Talegaon Plant in Maharashtra. The company plans to invest ₹200 billion in Tamil Nadu to expand its capacity and establish an electric vehicle ecosystem. The APA covers the acquisition of land, buildings, machinery, and manufacturing equipment situated at the Talegaon plant. The completion of the acquisition is subject to certain conditions and regulatory approvals. The company is aiming to launch new electric vehicle models in India in the near future.

Government appoints TCS to transform Government-e-Marketplace

The Indian government has chosen Tata Consultancy Services (TCS) to enhance and transform the Government e-Marketplace (GeM), an end-to-end marketplace for central and state governments, and public sector undertakings (PSUs), to procure common use goods and services. TCS will introduce an open

source, open-API architecture and advanced AI/ML technologies to the platform, enabling it to handle a predicted six-fold increase in GMV. The current GeM platform handles a Gross Merchandising Value (GMV) of ₹2,000 billion and serves over 70,000 buyers and 65,000 billion goods and service providers, including 800 billion MSEs.

Parliament passes law to auction and mine lithium reserves

The Indian parliament has passed a new law allowing the government to auction and mine newly-discovered lithium reserves, among other minerals. The law removes lithium and other minerals from the list of atomic minerals, allowing private companies to explore and mine them, which was previously restricted. Lithium reserves were discovered in the Jammu and Kashmir region, and more reserves are anticipated to be found in the near future. Besides lithium, other minerals such as titanium, beryl, niobium, and zirconium will also be open for mining and auction, expanding beyond state-run companies' limitations.

Hiranandani Group to set up ATMP unit, chip fabrication in Noida

Hiranandani Group's subsidiary, Tarq Semiconductors, plans to establish an assembly, testing, marketing, and packaging (ATMP) unit and a compound semiconductor fab plant in Noida, Uttar Pradesh. The approval for the fab plant is expected by October. The company aims to address the demand for compound semiconductors critical for high-power applications. Initial investment of ₹25 billion is planned for the ATMP unit, while the investment for the fab plant remains undisclosed. The company plans to partner with firms from the US and Japan for expertise in semiconductor fabrication. The project's first phase is anticipated to commence within 24 months of receiving approvals.

Foxconn signs ₹16 billion deal with Tamil Nadu for mobile component plant

Foxconn has signed a significant ₹16 billion deal with Tamil Nadu (TN) government to establish a mobile component manufacturing facility in the Kancheepuram district. This marks Foxconn's first major investment in India after parting ways with Vedanta, indicating a renewed focus on the Indian market. The investment is expected to employ around 6,000 people. The company is still considering the location and working on expanding its chip manufacturing capacity in India. Foxconn and TN have discussed various investment opportunities, including potential expansions in EVs and electronic components, with the aim of making TN a prominent electronics manufacturing hub in Asia.

India, US launch joint call for proposals on quantum tech, AI

India and the US have jointly launched a call for proposals on critical and emerging technology, focusing on quantum technologies and artificial intelligence. US Secretary of Energy, Jennifer M. Granholm, met
