

# “STARTUPS, With Their Entrepreneurial **MINDSET** And Nimbleness, Often Hold **THE KEY TO INNOVATION**”

TE Connectivity recently partnered with the Bangalore Chamber of Industry and Commerce (BCIC) Startup Hub to launch an accelerator programme in India. In an interesting conversation with Electronics For You's Yashasvini Razdan, Rahul Mathur, Director, revealed the company's plans as an accelerator for startups

**RAHUL  
MATHUR**  
DIRECTOR,  
TE CONNECTIVITY

**How has the Indian market evolved in recent years, and how has TE adapted its focus to cater to the specific needs of the Indian market?**

The Indian market has historically faced challenges due to its relatively small size and slow growth. However, over the past few years, there has been a significant shift in this landscape. The importance of India for an industrial technology company like TE has been steadily growing, leading to a significant shift in the landscape. TE has recognised this change and actively focuses on the Indian market. We are now able to cater to the specific needs of the Indian market by offering India-specific solutions. This involves working closely with our OEM customers to understand their requirements and developing products tailored to the Indian market. This increased focus on India has been a key area of emphasis for us recently.
