

Cranes Varsity – An EdTech and a Finishing School

Cranes Varsity, a division of Cranes Software International Ltd, founded to bridge the technological knowledge gap between Academia and industry. "Innovator technical training center turned EdTech platform,

Cranes Varsity has provided technical education services for over 24 years. Graduates and working professionals who receive our highly effective technology training succeed in advancing their careers to various levels.

Pioneers in training of Embedded & Automotive Systems, C, C++, MATLAB, Linux, IoT Architecture, Data Science, AI with Machine Learning, Deep Learning, and more. We cater to the training needs of a college student by providing them project oriented and internship courses, a fresh Graduate with Placement Oriented Courses, working professionals with the intense hands-on technical trainings and Corporates with customized technical trainings to fulfill their project training requirements.

To assist students, turn their passion into a career, we have assembled a team of accomplished, skilled subject matter experts from the industry. Our solid recruitment

and training collaboration, use of rigorous training methodology gets us top results. Our learning strategy is built around educating, adapting, and employing, allowing us to include our pedagogical techniques in the learning management system.

Cranes Varsity has developed its own LMS for administration, documentation, tracking, reporting, automation and delivery. The robust and user friendly LMS which has learning material, recorded sessions and huge question bank, makes the learning and assessments effective. We aim to satisfy the students through our training & placement opportunities.
