

UST Vision Checkout

Touchless Self-Checkout Solution powered by Computer Vision and AI

from a 360-degree view, the solution recognises purchasable items. The end user can then use gestures or mobile commands to complete the payment with touchless transactions. A retailer can view and analyse sales, pricing, and inventory information through an online dashboard that provides purchase data. With UST Vision checkout, businesses like food services, micro markets, coffee shops, convenience stores, and airport stores can tackle issues like queuing, labour costs, and lunch rushes. UST's integrated solutioning approach and depth of technical expertise in **hardware silicon designs, embedded software, embedded devices, and IoT** ensure a better customer experience, improve customer satisfaction, and

In a survey conducted by SOTI, 66% of retail shoppers preferred self-service over salespeople. The Vision Checkout Kiosk is UST's answer to accelerating checkout processes. The solution, which is powered by computer vision and gesture technology, provides 3x faster self-checkouts with AI-enabled, smart, touchless checkout. UST's Vision Checkout is a self-checkout POS that uses computer vision to identify SKUs. In-store checkout is expedited with accurate item identification, ring-up, and payment services, which improves the overall shopping experience.

In today's retail environment, retailers face high training costs, high checkout error rates, high shopping trip abandonment, slow checkout, and long waiting lines. A global research firm named Dunnhumby reported that 60% of store baskets contained six or fewer items, and this trend is expected to continue. UST Vision Checkout addresses the issues faced by retailers. These features include bar code scanning, touch screens, and the ability to display age-restricted products, frozen assortments, and fruits and vegetables.

To create a seamless purchasing experience, the UST Vision Checkout solution leverages edge computing and AI-enabled hardware to manage a virtualized network infrastructure and orchestrate the solution's machine vision workloads. By capturing critical product data

improve ROI for businesses across the globe.

About UST

For more than 22 years, UST has worked side by side with the world's best companies to make a real impact through transformation. Powered by technology, inspired by people, and led by our purpose, we partner with our clients from design to operation. Through our nimble approach, we identify their core challenges, and craft disruptive solutions that bring their vision to life. With deep domain expertise and a future-proof philosophy, we embed innovation and agility into our clients' organizations—delivering measurable value and lasting change across industries, and around the world. Together, with over 30,000 employees in 30+ countries, we build for boundless impact—touching billions of lives in the process. Visit us at www.UST.com
