

THE DASHBOARD

5G Transition Could Lead to an Increase in Smartphone Sales

Even though it is the third important feature being looked at, the 5G transition brings hope to the smartphone market. Reports show that respondents' future smartphone purchases may be shifted to ₹20,000 to ₹30,000. Samsung, Apple, and OnePlus continue to be the top three brands that consumers prefer. 51% of users of Samsung continue to remain loyal to the brand, while 43% fixate on remaining loyal even in their next purchase. Apple is the second most preferred brand in the country.

Renewable Energy Source Generation Drops

A total of 1972MW was installed in the country. Rajasthan topped the list with 457MW being installed followed by Maharashtra (456MW) and Tamil Nadu (381MW). While Madhya Pradesh installed the highest wind capacity of 324MW, Gujarat followed with 87MW. In October 2022 the generation of energy from these RE sources dropped 22% (12,198 MU) when compared to the previous month. The end of peak wind season is one of the reasons this could have happened.
