

Compact. Unmatched. Reliable.

That's Lenovo ThinkEdge® SE30.

Smarter
technology
for all

Lenovo

Powered by the latest 11th Generation Intel® Core™ i5 vPro processors, demanding tasks have never been easier to complete with the ThinkEdge® SE30. A game-changer in the segment, the Lenovo ThinkEdge® SE30 boasts a remarkable DDR4 memory that is ever-ready for challenging edge applications. The SE30 has an innovative fan-less design that guarantees efficient heat dissipation along with MIL-STD-tested device reliability and therefore boosts productivity even in the harshest of environments, meaning it stays reliable over the long haul.

The SE30 is IoT-ready and supports Wi-Fi, Bluetooth, 4G LTE, or 5G WWAN to efficiently transport your IoT data. Add to that a scalable IOBOX, it can deliver expandability features optimised for industrial environments. The SE30 also serves as a bridge, communicating with both WWAN and dual LAN devices. This makes everyday tasks faster and smoother now while also futureproofing against your edge computing needs.

The SE30 is MIL-SPEC tested for durability. A constant in the hospitality, retail, manufacturing, and healthcare sectors, the compact SE30 stands for increased productivity, unmatched reliability, and security. An array of accessories also allows the SE30 to be securely mounted on a wall, under a desk, or behind

a monitor using VESA mounts, power cages, or DIN rails. This can in turn replace thin client devices in healthcare settings, taking up even less space while offering full connectivity and computing capabilities.

Lenovo's range of globally certified ThinkEdge® PCs gives you greater power in a smaller footprint, so your processing power can be discreetly tucked away at the edge of your business, ready for action. With a scalable IOBOX for additional connectivity, the SE30 offers expandability features optimised for industrial environments that operate a wide variety of devices. The TPM 2.0 hardware crypto-processor chip uses RSA encryption to protect user information, while the Kensington lock slot offers physical security against device theft.

USE CASES FOR SE30

Retailers can rely on the SE30 to power signage and capture data from multiple sources, simultaneously, including sensors, traffic counters, and thermostats. The SE30 also helps drive manufacturing and production automation, with faster data processing from operations to it. Built for Gen Intel® Core™ i5 vPro™ processors for industrial computing has been certified for Windows 10 IoT Enterprise, Microsoft Azure IoT Edge, RedHat, Amazon Green Grass, and Ubuntu, making analysing and reporting in the network effortless.

ThinkEdge® SE50

ThinkEdge® SE70

Also available are the ThinkEdge® SE50 and ThinkEdge® SE70, now enjoy a greater and more efficient performance in a way smaller footprint all courtesy of Lenovo. Lenovo offers a comprehensive portfolio of services to support and protect your investments, so you can focus on the business at hand rather than worrying about it. The premier support also provides direct access to skilled and experienced Lenovo technicians for comprehensive hardware and software support.
