

USING NODE-RED

For IoT And Edge Computing

All of us make use of IoT in one way or the other today, and this usage will only grow in the near future. This article details how Node-RED, a powerful and easy-to-use programming platform, helps in implementing IoT and edge computing

DR GAURAV KUMAR is associated with various academic research institutes, where he delivers expert lectures and conducts technical workshops on the latest technologies and tools

The Internet of Things (IoT) is omnipresent in today's world. A few fields where it is dominant are listed below.

Smart health and medical services. Smart ambulances, hospital management, intelligent drug control, etc.

Smart cities. Smart traffic control, smart toll plazas, pollution monitoring, water quality management,

self-driven cars, drones, law enforcement, energy conservation, etc.

Personal applications. Smart health
