

LG Electronics appoints William Cho as CEO

LG Electronics has announced that it has promoted William Cho, its Chief Strategy Officer, to the position of Chief Executive Officer (CEO), effective December 1, in order to nurture new business opportunities and focus on digital transformation. Having joined Goldstar in 1987 and after spending four years in LG's overseas office in Germany, Cho has a storied career including roles as President of LG Canada, Australia and the United States. A graduate of Pusan University, Cho received his master's degree in business from Yonsei University in Seoul.

Intel appoints Steve Long as APJ regional leader

Intel Corp has appointed Steven A. Long as General Manager of Asia Pacific and Japan (APJ) region. Long, who is currently Corporate Vice President of the company's Sales, Marketing and Communications Group, will be responsible for Intel's overall business in the APJ region. Long holds a bachelor's degree in Latin American studies from Tulane University, an MBA from Texas A&M University, and is an alumnus of the Harvard Advanced Management Program.

Defence minister urges MSMEs to invest in India's defence sector

Defence Minister Rajnath Singh urged India's micro, small, and medium enterprises (MSMEs) to invest more in R&D and help strengthen the country's security, while speaking at conclave of the Society of Indian Defence Manufacturers. He disclosed, "We have an estimated ₹85,000 crore (₹850 billion) industry of aerospace and defence. The contribution of the private sector in this has increased to ₹18,000 crore." Addressing the MSMEs, he said, "You should bring new technologies, new products. Just should not think that just because of your small size, you cannot do great innovation."

Niti Aayog CEO urges not to repeat past mistakes in EV market

At Round Table Conference organised by the Ministry of Heavy Industries recently, Niti Aayog CEO Amitabh Kant said, "In the last 70 years, India has always been getting into the sunset areas of industry. And by the time you get into the sunrise areas of industry, it is too late." He added, "Therefore, we say that you get into the sunrise areas of the future, and if you get into these areas, you will become a global champion."

Government allocates budget for chip design related activities

Electronics and IT Minister Ashwini Vaishnaw has informed that the

Central government is allocating a budget of one billion rupees for chip design related work in the ongoing financial year. To push the development of semiconductors, the government has approved establishment of a gallium nitride (GaN) ecosystem enabling centre and incubator for high-power and high-frequency electronics.

India's electronics production reaches all-time high

India's electronics production recorded an all-time high at 5,336 billion rupees in 2020-21, increasing at a compound annual growth rate of 17% in the last five years. There has been an almost threefold increase in electronics production from 1,903.66 billion rupees worth of manufacturing in 2014-15.

Three Indian states in race to bag Tata's semiconductor OSAT unit

The Tata group is in talks with three southern India states—Telangana, Tamil Nadu, and Karnataka—to set up the group's semiconductor OSAT unit. The setup might also mean an investment to the tune of \$300 million in the finalised state. It is probable that the corporate house will be taking the final decision about the location within a month or two.

Solar PLI outlay likely to be increased substantially soon

The outlay of the Solar PLI Scheme might soon be increased to 195 billion rupees. This scheme was initially approved with an outlay of

Representational image

45 billion rupees. The bidders for the scheme have proposed to undertake integrated manufacturing of polysilicon to 4,000MW capacity solar modules. A total of sixteen bidders, as per IREDA, have qualified for the scheme.

Centre sets up database to keep track of drones

The Central government has registered around 29,500 drones in the country and has also initiated a move to create a database of such unmanned flying devices to keep a
