India Added 11.1 GW of Solar Capacity from January to November 2021

India added about 11.1 GW of solar capacity from January 2021 till November 2021, which is 249% higher compared to the installations done in 2020. Rajasthan added the highest utility scale solar capacity of about 3,615 MW. In the rooftop solar segment, about 2,605 MW of new capacity was added. Gujarat ranks first among the states with a capacity addition of 660 MW, accounting for nearly 25% of the total rooftop installations.
