

Package worth ₹760 billion being offered for chip industry

The Central government has announced a package of \$10 billion (₹760 billion) for setting up chip industry in India. The funding will be provided over a period of six years for setting up semiconductor chip design, packaging, and manufacture ecosystem in the country. This is expected to bring in global investment of about ₹1700 billion to the country, according to Electronics and IT Minister Ashwini Vaishnaw. The government will not only provide infrastructure support but also fast-track clearances.
