“We Will Have A Group Of SUCH SATELLITES MONITORING THE EARTH On Daily Basis”

GalaxEye team with some of their mockups

GalaxEye, an IIT Madras incubated space tech startup, aims to send a constellation of satellites equipped with their proprietary sensor called Drishti into space. Suyash Singh, Co-Founder and CEO of GalaxEye, talks about the startup's journey so far and their plans for the near future. Here are some extracts from his conversation with EFY's Aaryaa Padhyegurjar
