

Scanning Electron Microscope (SEM) ZEISS EVO Family

Seeing beyond

Modular SEM Platform for Intuitive Operation, Routine Investigations and Research Applications

- ✓ Versatile solution for central microscopy facilities or industrial quality assurance laboratories
- ✓ Excellent images from any real-world sample
- ✓ Maximum image quality with the lanthanum hexaboride (LaB6) emitter
- ✓ Imaging and analytical excellence on non-conductive and uncoated samples
- ✓ Workflow automation and data integrity

parts or samples, investigators can go for Energy Dispersive Spectroscopy (EDS) to acquire spatially resolved elemental chemistry information.

SEM and EDS have to be paired with careful consideration.

ZEISS SmartEDX on EVO is ideally suited for routine microanalysis applications, particularly for customers with high standards for data reproducibility.

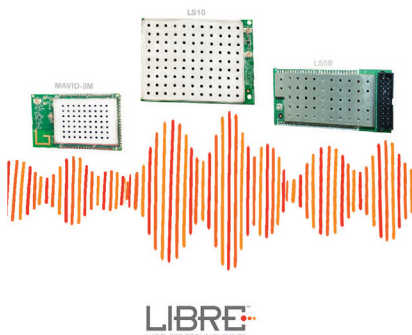

ZEISS SmartEDX is optimized to detect low energy X-rays from light elements thanks to superior transmissivity of the silicon nitride window.

If SEM imaging alone isn't enough to gain a complete understanding of

Revolutionary Audio Streaming Solution

Audio streaming is a technology that lets the listeners enjoy continuous streaming of audio files like music, podcasts, voice-overs, lectures, etc., over the internet. The primary advantage of audio streaming lies in the privilege to listen to the audio without downloading. According to the latest survey, streaming industry grew by 24.3% in 2022 and will continue to grow with the increase in streaming users. Streaming services like Spotify, Jio Saavn, Gaana, Wynk, Apple Music, YouTube, Amazon Prime Music are

popular in India as they are scalable.

Libre Wireless is a legacy audio streaming company that is delivering cloud streaming services since the past 2 decades. We enable new applications by providing turnkey solutions with best-in-class tools & support. LS10 is our high-performance media/audio streaming module with A53 CPU running at 1.5GHz. It incorporates 802.11a/b/g/n/ac and Bluetooth v5.0 (BT/BLE). The module can be integrated with Premium speakers, Sound bars, Amplifiers with different options of Music Services and Eco systems such as Apple AirPlay2, Amazon Alexa, Google Chrome Cast and Spotify including the respective MRA. Moreover, we have a Wi-Fi-6 AX, 2x2, BT 5.1. enhanced version of LS10 called as LS11.

Libre's LS5B Wi-Fi media modules offer complete Wi-Fi and media

processing functions with Libre's extensive LibreSync App and SDK that includes all-important networking, control, system interface, media streaming and popular music services including Spotify and AirPlay 2.

In addition, Libre provides MAVID-3M, a Wi-Fi BLE low cost IoT device with AVS Voice. The efficient low power mode state enables MAVID-3M which is well suitable for portable battery powered devices and entry level IoT devices.

Libre has worked closely with ecosystem leaders and top music service providers to bring customers the best of audio streaming in the market.
