

*astTECS provides end to end Open source Enterprise Communication Solutions

It is known for a fact that businesses and people are empowered when digital transformation is booming. The rapid innovation in various enterprise mobility technologies is bolstering this transformation. On the other hand, with converging networks and new enterprise applications, the main focus is on disruption, growth, and transition. To have maximum benefits from the business, enterprises are on the hunt for end-to-end unified communication and enterprise mobility product providers. This not only helps them to thrive in a competitive market but also helps in increasing scalability, resilience, and reliability. With secured Enterprise Telecom products providers, big firms can have maximum benefits from their resources and technologies to aid revenue growth, and profitability and, also enhance their operational costs.

To meet the demand, *astTECS has emerged as one of the leading providers of unified communication solutions based on Open Source Technology. *astTECS enterprise telecom products helps businesses in providing better customer engagement and enhance team performance and ensures quick ROI.

*astTECS offers complete enterprise telecom suit - IP PBX, Contact center solution, Voice Logger, IVR, Cloud Solutions, IP Phones, Gateways, PRI Cards, VoIP Minutes & Security Solutions (Firewall, VPN, SBC) with multiple deployment options - on-premises, cloud as well as hybrid solutions. *astTECS has become one of the first open-source companies to get TEC certification as per Govt.
