Factovize - Smart Factory

Industry 4.0 adoption increases factories to enable closer man machine collaboration to increase the productivity, improve Man/Machine/Material utilization and track the overall process end to end. Factovize 'Smart Factory' helps you with the following tools / benefits to charge your shop floor to the next generation.

Digital Transformation - Utilize comprehensive digitization and a paperless approach to quickly access, retrieve & manage error-prone data

Production Planning - Frame your plan for each machine to enable greater traceability, gain superior data insights and create best practises across the entire workflow.

Production Monitoring - Continuously monitor the production with real time visual representation of data for the highest level of efficiency & data insights.

Process Parameter Monitoring - Capture the key process variables to comprehend in real time and make them available to operatives running the process.

WIP Management - Streamline your operating costs by digitally assessing your Work In Progress and having a real-time view of your overheads.

Machine Maintenance - Machine downtime along with the reason & machine maintenance captured to ensure that we reduce MTTR & increase MTBF with deep understanding.

Management Dashboards & Drill Down helps you know the live status of each department, each machine at a granular level of Day, Shift & Hour.

Traceability - Ability to track & document every part and product throughout the manufacturing from raw material entering the factory to shipping the finished goods

Rol - Better management of resources and energy in both operational and energy expenses gives an Rol in 6 to 9 Months.
