Metaverse All Set to Reach US\$996 bn by 2030

A recent report suggests that the metaverse market will reach US\$996 billion, with a 39.8% CAGR by 2030. Last year, Asia-Pacific and North America together held 50% metaverse market share and with an increase in the number of startups the metaverse market revenue would boost. It is noteworthy that various market participants from the technology sector—including the manufacturers of semiconductors, their components, and application software—are also leveraging this mega-theme of the metaverse, elevating its market size to \$22.79 billion in 2021.
